3-week health campaign

MALACCA: The Pantai Hospital Ayer Keroh (PHAK) will hold a three-week health care campaign between July 19 and August 10 promoting free health tests and health products at special rates.

It is based on the concept of a one-stop health centre and will involve the participation of multinational corporations and local organisations.

Visitors can look forward to quality cycling apparel; bicycles and cycling accessories; cholesterol, CO and prostate screenings from Pfizer; diagnostic equipment; eye wear and footwear, among others.

The campaign, aimed at encouraging fitness and health, is expected to attract about 150 visitors daily. — *By B. Suresh Ram*
